

HARDIK KHANCHANDANI

Senior React Native Engineer

+91-6350360159 web.hardikhere@gmail.com https://github.com/hardikhere Bengaluru, Karnataka, India

SUMMARY

I am a Senior React Native Engineer with over **4.5 years** of experience in designing and implementing mobile applications that serve **millions of users**. My expertise lies in crafting scalable solutions and optimizing performance, demonstrated through my contributions to **Zepto, and Unacademy**. I have experience in building Vybout end to end and scaling it to **7000+ installs**.

EXPERIENCE

Co-Founder & Founding Product Engineer

VYBOUT 08/2025 - 05/2026 Bengaluru, Karnataka

Social Experiences Platform

- Built and scaled VYBOUT from 0 to 7,000+ registered users, owning architecture, **mobile development, backend systems, deployment, analytics, and production operations** as the sole engineer
- Architected and shipped 30+ production features across social discovery, bookings, onboarding, notifications, user profiles, chat, and engagement workflows using **React Native, Node.js, and Supabase**
- Integrated critical systems: Phone OTP, Google Sign-In, Apple Sign-In, Payments, DigiLocker, Google Places API, OpenAI API integration
- Led product and technical execution, translating user feedback and business requirements into roadmap priorities, feature specifications, and **rapid production releases**
- Established CI/CD pipelines, crash monitoring, analytics, release management, and scalable architecture to enable reliable iteration

Software Engineer (Mobile)

ZEPTO MARKETPLACE

10/2024 - 08/2025 Bengaluru, Karnataka

- Owned **checkout and post-order experience** improvements for a platform serving **10M+ monthly active users**, enhancing customer experience and reducing support escalations
- Led migration from Redux-Saga to Zustand and RTK Query across 15+ critical modules, reducing state-management complexity and improving maintainability and application performance
- Drove technical design discussions and authored Technical Requirement Documents (TRDs), aligning product, backend, QA, and mobile teams on architecture, rollout strategy, and execution plans
- Mentored engineers** through code reviews and technical discussions, improving engineering consistency and code quality across the mobile codebase

KEY ACHIEVEMENTS

- Vybout User Growth**
Successfully co-founded and scaled Vybout to over 7000 users, implementing critical system integrations and engineering best practices
- Zepto Checkout Pref**
Improved Zepto's Checking screen to make it more performant and feature rich driving it through server, resulting in improvement of 16% dropoffs

TECHNICAL SKILLS

Frontend and Mobile

React Native	React	Next.js
Expo	Redux	React Query
React Testing library	Jest	

Programming Languages

TypeScript	JavaScript (ES6+)	
SQL	HTML5	CSS

Backend and BaaS

Node.js	Supabase	Cloudflare
Vercel	Firebase	

Tools and Monitoring

Sentry	Crashlytics	Mix Panel
Cloud Code	Xcode	
Android Studio	Postman	

EXPERIENCE

Software Engineer (Mobile)

UNACADEMY 01/2024 - 10/2024 Bengaluru, Karnataka

- In **NextLevel team** building job application platform with AI interview feature
- Optimized Home screen loading time 25% by introducing **API Caching Strategy** and API prioritization
- Fixed 20+ Critical production crashes some from our side some from Packages installed using patch-package
- Mentored team to use **Typescript and RTL** which improved code quality over time and test coverage to 40% of codebase
- Led development of high-impact features including revamped onboarding flow (15% improvement in completion rate) and Home Feed **personalization widgets** that drove measurable engagement lift

Software Engineer

EARLY CAREER FOUNDATION - Mosaic Wellness + Clumio

05/2022 - 08/2023 Bengaluru, Karnataka

- Built Personalization feature which helped user to find solution as per their health condition feed will be dynamically changed as per user condition
- Patient Chat and Calling system for online consultations which helped **45k+ patients** to find solution to their health problems
- Designed and shipped React-based automated provisioning system and rearchitected M365 backup interface. Spearheaded testing initiative achieving 2x improvement in testing efficiency
- Developed scalable React Native components for core mobile commerce application, collaborating with design and backend teams on pixel-perfect feature implementations

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Rajasthan Technical University

08/2018 - 05/2022 Rajasthan, India

ADDITIONAL SKILLS

- Product Thinking
- Mentoring
- Technical Leadership
- Technical Documentation
- Team Building
- Community Building
- User Research
